

HARDIK MITTAL

Computer Science & Engineering Student

✉ mittalhardik2007@gmail.com | [GitHub](#) | [LinkedIn](#) | 📞 9817068911 | 📍 Panipat, Haryana

Professional Summary

Analytical and results-driven Computer Science engineering student with a strong foundation in software development, data science, and financial technology. Experienced in building full-stack applications, data-driven tools, and corporate accounting workflows. Looking to leverage technical expertise in Python, SQL, and machine learning to drive high-level strategic decision-making and operational efficiency.

Technical Skills

Languages: Python, SQL, C++, Javascript, HTML/CSS

Data Science & AI: Scikit-Learn, Pandas, Numpy

Frameworks: Django, Flask, Streamlit

Databases & Tools: SQL, Git/GitHub, Vercel

Technical Projects

Diabetes Prediction Model

[GitHub](#)

Python • Scikit-Learn • Pandas • Matplotlib

- Developed a machine learning pipeline to predict the likelihood of diabetes in patients based on diagnostic medical variables.
- Conducted exploratory data analysis (EDA) and data preprocessing, and trained a Random Forest classifier to achieve 92.16% predictive accuracy.

Car Price Prediction Model

[GitHub](#)

Python • Scikit-Learn • Pandas • Matplotlib

- Developed a Linear Regression model to accurately predict used car prices based on vehicle features such as mileage, brand, and manufacturing year.
- Engineered data preprocessing pipelines, handled missing values, and performed feature engineering to optimize the model's predictive performance.

Movie Recommendation System

[GitHub](#)

Python • Streamlit • Scikit-Learn • Pandas

- Developed a content-based recommendation engine that filters and suggests films based on nuanced content similarity.
- Executed end-to-end data cleaning, text vectorization, and deployed an interactive user interface via Streamlit.

Leadership & Experience

IEEE Student Branch, JUIT

2026 – Present

Treasurer

- Manage financial planning, budgeting, and resource allocation for branch events and technical initiatives.

Procurement & Events Coordinator

2026 – Present

- Managed procurement planning and optimized allocation of resources for student events.
- Coordinated logistics and operational execution to ensure successful event delivery.

Certifications & Achievements

- Solve 200+ Problems on Leetcode
- Django Web Framework Certification – Coursera
- Full Stack Certification – Coursera

Education

Jaypee University of Information Technology (JUIT), Solan

Expected Graduation: 2028

B.Tech in Computer Science & Engineering

CGPA: 8.25

Piet Sanskriti Senior Secondary School, Panipat

2022 – 2024

Class XII (CBSE)

Grade: A+
